

# Fundquest R&D Refunds and Tax Credits

Canada's Scientific Research & Experimental Development ("SR&ED") Tax Credit Program is a CRA Program that rewards innovative companies who are investing in new Technology Development in Canada. The Program provides lucrative Refunds and/or Investment Tax Credits ("ITC"s) to support your R&D Project Expenditures performed in Canada. SR&ED provides between \$3 to \$4 billion dollars to about 20,000 companies annually.

Companies of any size can submit SR&ED claims. The most lucrative Refunds and/or Tax Credits rates are offered to Canadian Controlled Private Corporations ("CCPC"s). You may qualify to receive SR&ED if you are conducting experimental development trying to solve a technological problem with no currently known solution.

**Your competitors are likely claiming SR&ED.  
You can too if you meet the following criteria:**

- » Conducting innovative R&D Projects in Canada.
- » Paying T-4 Salary to Canadian Employees to work on those projects.
- » Paying Canadian Contractors to work on those projects.
- » Paying for materials consumed on those projects.
- » Adding to the Technological Knowledge Base in Canada.

**Contact our experienced SR&ED Submission Managers to help you – if your claim is not approved, you pay no fee to FundQuest:**

- » Determine if you have a SR&ED Eligible Project to claim.
- » Quantify your potential Refund or ITC (Investment Tax Credit).
- » Explain our process for your Claim Preparation.
- » Complete your SR&ED Claim for submission with your T-2
- » Assist you in the event of a CRA Review or Audit.

**If you are conducting innovative new Technology Development R&D in Canada, and supporting your project(s) with Canadian project expenditures, then you may be entitled to substantial Refunds and or ITC's.**
